Ductile Iron Flanged Fittings

TAPS AND BOSSES

Flanged Fittings may be drilled and tapped if the fitting wall thickness will provide the effective thread length as shown in the following table.

DRAIN TAPPINGS

Tap Size	3/8"	1/2"	3/4"	1"	1-1/4"	1-1/2"	2"
Length of Thread "A"	0.41"	0.53"	0.55"	0.68"	0.71"	0.72"	0.76"

These lengths are in accordance with the effective thread length as required in ANSI B2.1. If the tap size is too large to be accommodated by the standard fitting wall thickness, an integrally cast boss may be required to provide the necessary thickness for tapping.

The following will serve as a guideline for maximum tap sizes into standard fitting wall thicknesses for ANSI/AWWA C110/A21.10 Flanged Fittings:

Fitting Size	Maximum Tap Size Without Boss
3"	1/2"
4"-6"	3/4"
8"	1-1/4"
10"-16"	1-1/2"
18"-42"	2"

To accommodate larger size holes that are impractical to thread, it may be necessary to integrally cast a flanged boss to the fitting. In this case, a boss the size of a flange shall be integrally cast. The hole shall be cored or drilled at our option. The flange boss shall be faced and the bolt holes drilled and blind tapped so as not to interfere with the fitting wall thickness.
